

PASSION | TECHNOLOGY | TRUST

Established in 1965, Renesco has developed from a local Swiss tunnel sealing company to an internationally recognized specialist for the execution of waterproofing and grouting solutions for all kinds of underground, hydraulic, civil and environment structures.

Our services include sheet waterproofing/ geomembranes (e.g. PVC, FPO/TPO and HDPE), liquid applied/ sprayed waterproofing, bonding sealing systems for new structures or restoration work. Full service in chemical and cementitious grouting/injection is available inclusive of specialty drilling services.

CAD DRAFTER (PART-TIME)

Our company has an immediate opening for a self-motivated individual with a strong work ethic to join our team as CAD drafter. While we are not looking for someone to be in the office while they are doing the work, coordination and some office time will be required. In this role you will be expected to work closely with the pre-construction team to quickly and efficiently produce quality construction shop drawings as they relate to underground waterproofing. You will support management by providing accurate and timely fabrication drawings. You will use Auto-CAD software to modify and verify initial schematic designs and transform them into working documents for submission to General Contractors and the customer. Knowledge of underground waterproofing not required, but a willingness to learn and attention to detail is a must.

DUTIES & RESPONSIBILITIES

- Create and revise project shop drawings.
- Independently draft documents when provided with verbal or written instruction by Preconstruction or Project Management team.
- Maintain high quality standards using sound drafting principals.
- Coordinate requested changes with Project Engineers and Project Managers.
- Generate all drawings within the allotted deadlines.
- Provide accurate drawings to the team that match approved shop drawings.
- Update drawings to meet final installation.
- Additional duties as assigned by management team.

MEASUREMENT AND PERFORMANCE

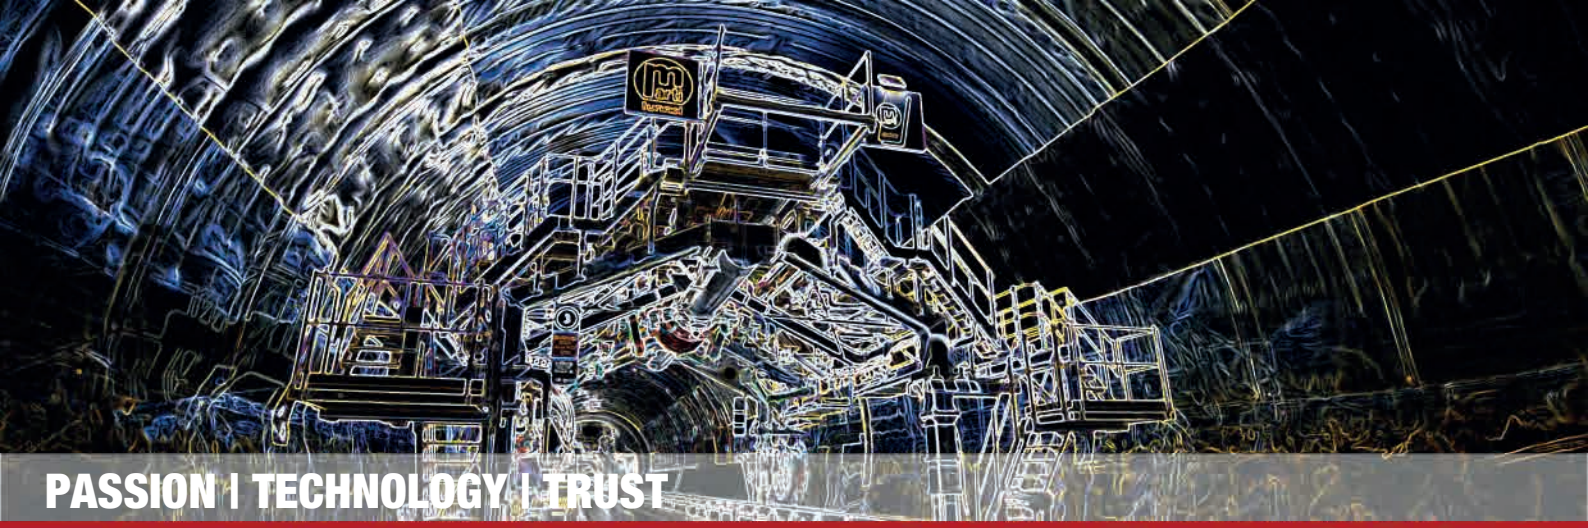

- Accuracy of shop drawings
- Accuracy of fabrication drawings
- Timely generation and release of shop drawings and fabrication drawings to preconstruction and fabrication teams.
- Strong organization skills and tracking of drawing changes
