

PASSION | TECHNOLOGY | TRUST

Established in 1965, Renesco has developed from a local Swiss tunnel sealing company to an internationally recognized specialist for the execution of waterproofing and grouting solutions for all kinds of underground, hydraulic, civil and environment structures.

Our services include sheet waterproofing/ geomembranes (e.g. PVC, FPO/TPO and HDPE), liquid applied/sprayed waterproofing, bonding sealing systems for new structures or restoration work. Full service in chemical and cementitious grouting/injection is available inclusive of specialty drilling services.

We deliver under tight program controls by working efficiently with highly qualified and motivated team members.
